Work Experience

Yoreferee, Whistler— Frontend Developer (VueJS)
August 2021 – November 2021.

I have taken on a temporary contract with Yoreferee in order to expand on their web application and a wide range of bugs. While I have primarily focused on frontend related issues and their VueJS code, this contract has also given me a chance to explore Firebase.

Snappy Innovations, Toronto — Product Developer (VueJS, Angular, Flutter)
May 2020 – August 2020.

Taken on the responsibility of leadership over exciting web applications built in VueJS and AngularJS. This role includes expanding upon and building several restaurant CRM web apps. These include making online orders, earning and redeeming punch cards and coupons, and the purchasing of store credits and gift cards. I have taken a large role in creating their POS application using Flutter.

Nobal Technologies, Calgary — Full Stack Web Development (VueJS & Laravel)
April 2019 – Ongoing

As a Full Stack Web developer, I have taken lead on the complete rebuild and redesign of Nobal's CMS (Content Management System) in order to provide both developers and clients with the most seamless experience when maintaining Nobal's iMirror. This involved rebuilding and expanding on a large range of features. I have continued working with Nobal as a part time contractor in order to build multiple mobile directed web applications in VueJS
